7. Disclaimer regarding hypothetical performance results

Hypothetical performance results have many inherent limitations, some of which are mentioned below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and actual results subsequently achieved by any particular trading program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example the ability to withstand losses or to adhere to a particular trading program in spite of the trading losses are material points, which can also adversely affect trading results. There are numerous other factors related to the market in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

terms at your own initiative without any solicitation by us or any of our affiliates and have made your own independent decision with respect to the matters contemplated by the Terms with no reliance being made upon us.

10. Derived Data

Our proprietary derivation consumes raw market data and executes a 2-factor derivation process to produce the displayed price, later consumed by the price engine. Derived market data is sourced and supplied from various sources and can therefore be blended.

The derivation process involves changing the raw price by a factor determined by the volume of trading on the underlying market, a randomized variable and a maximum offset amount. The derived data price is only ever displayed to our non-professional clients, the derived data price then being the proprietary value of an organization.

At no point is raw data accessible by any client, nor can said data be reverse-engineered in any manner. All markets are passed through the same derivation engine.

11. Access and security

You accept responsibility for the confidentiality and use of any username and email address that use to register for your access to and use of our services. Bondfish cannot and will not be liable for any loss or damage arising from your failure to comply.

Bondfish protects such private information from unauthorized use, access, or disclosure in the same manner that it protects personal data (please refer to our [Privacy Policy](#) for more information).
